

vibris *the new bristle!*

prepared blends from nexstar

Vibris synthetic bristle is a vibrant blend of advanced polyester fibers for manufacturing quality paintbrushes. Its an economical and adequate solution for most requirements and is available in five versions, P, S, M, E+ & E.

feature

Snap Back

Vibris fibers are very flexible. Paintbrushes made with Vibris have a low snap back & rebound softly, a feature so far available only in natural or full (mechanically) tapered fibers.

Vibris E+

tipped & flagged tops

Vibris M

tipped & flagged tops

Vibris S

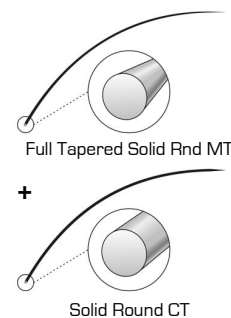

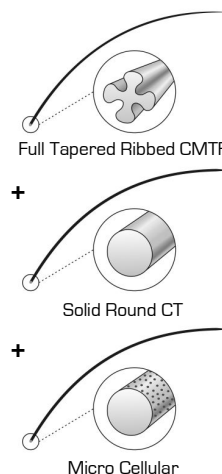

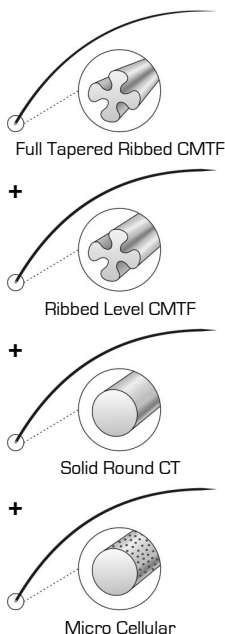

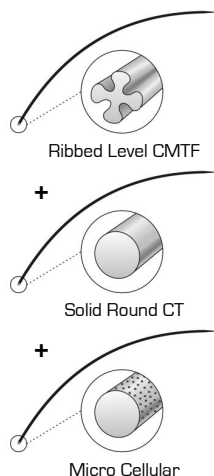

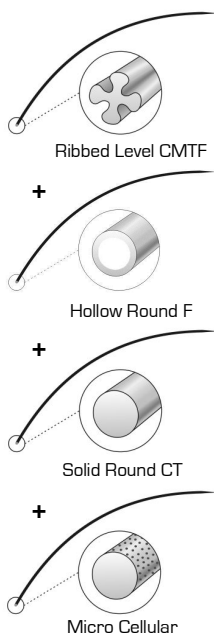

silk tops

Vibris P

silk tops

Vibris E

tipped & flagged tops

Full Tapered

highlight
Mechanically tapered fibers, extruded with a thick butt & a thin tip, release paint evenly & smoothly and are manufactured using specialised technology. Nexstar is one of the few manufacturers worldwide currently producing these type of fibers.

Extrusion

highlight
Vibris fibers are manufactured on sophisticated extrusion lines with closed loop controls. All relevant parameters are monitored and automatically adjusted to achieve desired standards. Manufacturing videos may be viewed on our website or on youtube - user jpnexstarbiz.

Gold+Honey or Black

highlight

Micro Cellular

Tiny mineral particles (Um 2-65) with a low density of 0.58 to 0.65 g/cm³ are extruded together with the polymer. These special fibers have a very high paint pickup, are lighter in weight and do not make the brush dense.

performance
